# CONCRETE PUMP

## Rubber Hose

Concrete Pump Rubber hose is used for conveying mortar or concrete in various fields including the agricultural, the construction industry, the naval and mining sectors. This type hose is good wear resistance, abrasion and excellent flexibility. It is also used for wet concrete with high head pressures at the critical flex areas of a boom truck, and as a discharge hose on the delivery end of high-pressure concrete pumps.

## Concrete Pump Rubber Hose

### Construction:

- **Inner Tube:** Black abrasion resistant synthetic rubber
- **Reinforcement:** High Tensile Steel Cord
- **Cover:** Black SBR/NR- abrasion and ozone resistant
- **Temperature :-** 40°F to 180°F (-40°C to + 82°C)
- **Coupling:** As required

Inner Diameter		Wall Thickness	Outer Diameter	Cord Ply	Working Pressure	Bend Radius	Weight
inch	mm	mm	mm	layer	bar	mm	Kg/m
2	51	4.0	69	2	85	200	2.8
2.5	64	4.2	86	2/4	85	250	4.3
3	76	5.5	103	4	85	270	6.0
3.5	89	5.5	116	4	85	290	7.5
4	102	5.5	130	4	85	300	9.1
4.5	114	5.5	143	4	85	320	10.5
5	127	5.5	158	4	85	360	12.8
6	150	5.5	186	4	85	570	17.0
